

College for a Day

College for a Day program was created by Vic Jose and Dr. Vickie DeMao in 1998 in order to familiarize the Wayne County 8th graders with the four college campuses in Wayne County. The goal of the program is to help students feel welcome and comfortable on a college campus, to determine the difference among the four types of institutions and what they offer, and to emphasize the importance of doing well in school to prepare for college entrance.

Students are provided tours of the Earlham, IU East, Ivy Tech and Purdue campuses and programs. They are also presented with information on the Twenty-first Century Scholars program. The Wayne County Foundation coordinates the program and provides the lunches.
